- Land Supply***
- Available
- Underutilized
- Utilized

*The Land Supply is derived from an inventory of available land (vacant or undeveloped land) and underutilized land (land likely to be redeveloped or be further developed with "infill"). All developed land that is not likely to be redeveloped is considered utilized and therefore not part of the supply. The Land Supply Analysis is based on a ratio of structure value to land value and additional datasets provided by the Town of Apex and Wake County.
