

Apex Peakway SW Connector

Public Open House

STIP Project No. U-5928

December 2016

Welcome to the Open House for the Apex Peakway Southwest Connector project! This is an opportunity to:

- Review maps showing the project preliminary design
- Take a look at visualizations showing what the completed project may look like
- Ask questions of the project team
- Provide input using a comment form

Project Background

The Apex Peakway is planned to serve as a loop around the Town of Apex. The Southwest connector project would complete a missing gap in the loop at South Salem Street by constructing a bridge over South Salem Street and the CSX railroad tracks. Turning movements between the Apex Peakway and South Salem Street would be made using a quadrant loop road.

The project would require the permanent closure of the existing at-grade railroad crossing along Tingen Road, east of the project location. A pedestrian-only crossing is being investigated at this location.

The project would require the temporary closure of the Apex Peakway between Towhee Drive and South Salem Street for the duration of construction.

Project Progress

INFORMATION AND COMMENTS

For more information about this project or to express any comments or concerns, please contact one of the project managers below. Please refer to the project number (U-5928) or project name (Apex Peakway SW Connector) when writing about the proposed project.
